

GEOCIL WEEDMAT

The Original Non Woven Weedmat

Why use Geocil Weedmat

Geocil Weedmat non-woven weed control fabric facilitates better garden and plant management. Irrigation and liquid fertilisation through Geocil Weedmat optimises growing conditions. Geocil Weedmat is easy to cut and will not fray on the edges.

Installation

Geocil Weedmat can be cut to the size required easily with scissors or a knife with no risk of fraying. Prepare the area to be covered by removing weeds and grass. This can be done by weeding or spraying, but to ensure complete success, all weeds such as oxalis, kikuyu, couch and other types must be thoroughly removed. Cut the Geocil to fit the size required and lay over prepared ground, if plants are to be planted through the fabric, cut a cross slit large enough for the plant roots and place plant in prepared hole. backfill and pin edges of weedmat back .

The weedmat may be held down using plastic or wire weedmat pins. Once the area is covered, lay landscaping materials such as bark, pebbles, shells, scoria or other suitable mediums to cover the weedmat.

Properties

Weight 60 grams / m²
Colour Black or Green
Roll Widths 1m, 2m wide
Roll Lengths 10m, 20m, 25m, 50m, 100m

Specifications may vary from those stated in product information.
