

Agriculture and Horticultural applications

Ground cover for Growers and Landscapers

As a replacement for traditional plastic mulches, Ground cover in either Woven or Non Woven Weedmat helps maintain a higher soil temperature for earlier cropping, allowing roots to breathe and moisture and nutrients to permeate without excessive puddling. If higher water permeability is required consider Geocil or Ecocil Non Woven Weedmat. Woven Weedmat gives excellent weed suppression, reduces maintenance, lasts longer and improves profits

WEEDMAT ULTRA -PRO WOVEN

Domestic grade woven weedmat

Ultra-Pro Woven Weedmat is a tough specially woven fabric with advantages over other ground covering methods. It allows water and air to penetrate the fabric allowing nutrients to reach the plants roots.

Available in Black and comes in assorted widths, 0.60m, 0.91m, 1.83m, 3.66m and the standard roll lengths are 50m or 100m

Weight of fabric is 95 to 100gm² with a life expectancy of between 3 to 5 years depending on application

WEEDMAT COMMERCIAL GRADE WOVEN

Commercial grade woven weedmat

Weedmat Commercial grade is also a tough woven fabric as the Ultra-Pro woven weedmat but is heavier in weight for the toughness required for the Commercial Growers

Also in Black and is available in a 4.5m width with the standard lengths also being 50m and 100m

Weight is 105 to 110gm² with a life expectancy also 3 to 5 years depending on application

GEOCIL NON WOVEN WEEDMAT

The original UV non woven weedmat

Geocil Weedmat is a Non Woven weed control fabric which allows air and water to pass through the fabric. Geocil is easy to cut with a pair of scissors and will not fray.

Available in Black and Green in widths of 1m and 2m with standard roll lengths being 50m and 100m. Smaller lengths rolls are available (10m, 20m, 25m) Weight is 60gm² with a life expectancy of between 3 to 5 years depending on application

ECOCIL NON WOVEN WEEDMAT

Lightweight UV non woven weedmat

Ecocil Weedmat is a lighter version of Geocil but still has the same attributes as Geocil. At a weight of 50gm² and is available only in Black. Standard widths are 0.90m and 1.80m and come in 10m and 20m lengths.

Life expectancy also between 3 to 5 years depending on application

ULTRAMAT

White reflective woven ground cover

Ultramat is a commercial grade white reflective ground cover. Its bright white colour helps to promote increased crop growth by more light reflection, it is made from hard wearing 100-110gsm UV stable polypropylene. Ultramat has planting lines to assist with crop alignment if required.

Sizes; 1.1m, 3.3m, 4.15m wide 50m, 100m rolls

HESSIAN

Biodegradable ground cover

Hessian has many applications and can be used as lightweight ground cover, soil and embankment stabilisation and also used in keeping concrete moist while setting. Hessian has an expected life of approx 2 years.

Sizes; 1.8m per meter 1.8m x 50m bales
