

PANDA BLACK AND WHITE FILM

Hydroponic films are Black and White Co-Extruded Polythene, manufactured using three layers for tough long life performance.

Roll sizes available

600mm x 400m 125mu

2 metre x 50 metres 105mu

4 metre x 50 metres 105mu

Full welded floor sheets to any size.

What are the advantages of using Black and White films as floor sheets

Weed control in the greenhouse is more effective with the black underside.

The White upper surface reflects light to produce more even growth.

Fruit and crops ripen better from reflected light and heat.

Less splashing of mud and soil to clean from crops.

Insects are discouraged by the more even spread of reflected light.

Hydroponic gullies, troughs and nutrient tubes are easily constructed using PANDA Gully films.

Construction is economical and easily maintained.

The white surface aids in plant and fruit growth by reflecting the light evenly and controlling temperature.

Specifications may vary from those stated in product information.
