

PROPERTY	UNIT	ULTRAPRO SILTSTOP
MASS	G/M2	90
TENSILE STRENGTH	KN/M	20
FLOW RATE	L/M2/SEC	30
ROLL SIZE	M	.86M X 50M
COLOUR		GREEN

- U.V. STABILISED
- HIGH STRENGTH WOVEN MATERIAL

TYPICAL INSTALLATION METHOD

Silt fence fabric can be attached to waratahs, posts or a site boundary fence line as required using wire, clips or other methods.

The bottom edge of the fabric should either be buried in the ground or held securely to the ground using weed mat staples or weed mat plastic pins.

Water runoff from the site will filter through the fabric and the sediments or solids will be deposited at the base of the fence and can be removed later if required if sediment build-up causes runoff problems or blockages.
