

TREE PROTECTOR

TREEGUARD Tree Protector has been developed as a long life versatile way of protecting establishing trees from grazing animals.

By using **TREEGUARD Tree Protector** trees can be established with the continued presence of grazing animals.

TREEGUARD eliminates the requirement for expensive fencing of the establishment areas.

TREEGUARD was developed primarily as trunk protection for willow and Poplar poles planted for reforestation or erosion control.

For Protection from cattle use 1.7 metre lengths and for protection from sheep use 1.2 metre lengths. For other trees cut lengths as required.

TREEGUARD Features

Diamond mesh allows for trunk expansion.

Heavy weight construction

UV stabilized for long life.

50 metre rolls can be cut to required lengths.

Produced as a tube - no side joins
