

Cosio Ultrapro Birdnet is manufactured from UV stabilised mono-filament HDPE for longer life

The 16mm square hole prevents even the smallest birds damaging crops.

Used by fruit, grape, crop growers nationwide.
Also effective against opossums.

Directions

Drape directly over the grape vine rows or fruit trees before the growing season. The bale can be applied from a tractor tray or manually as is required. Biobird will fit most standard netting applicator attachments. Where joins are required, simply overlap netting. If netting is not wide enough to reach the ground, the bottom edges can be clipped together under the rows to prevent birds reaching the crop.

Product Sizes and Specifications

Netting aperture size	16mm square	
Colour	Green / Black / White	
Packing	Roll	
Width available	4m,	6.5m
Roll Length	50m,	300m

Specifications may vary from those stated in product information.

ULTRA-PRO CANOPY NET

The Professionals Choice

ULTRA-PRO Canopy net is made specifically for NZ conditions.

Manufactured from UV stabilised HDPE Monofilament yarn gives a life expectancy of over 10 years, but carries a pro-rata warranty of 10 years against material degradation.

Ultra-Pro Canopy net is 50gm² and is available in 5m and 10m widths and standard roll lengths of 100m. Both widths available in Black or White.

Ultra-Pro Canopy is a great investment to protect your crops from bird damage and major storms.

ULTRA-PRO HAILNET

The Professionals Choice

Ultra-Pro Hailnet is manufactured to withstand New Zealand's harsh climate.

Manufactured from UV stabilised HDPE Monofilament yarn gives a life expectancy of 10 - 15 years, but carries a pro-rata warranty of 10 years against material degradation.

Ultra-Pro Hailnet is 75gm² and is available in a 6.5m width and the standard roll length is 200m. Ultra-pro Hailnet has a approx shade factor of between 16 - 18%.

Ultra-Pro Hailnet is manufactured with 100mm reinforced bands on the 2 outer edges and also in the centre to allow the material to sit or be clipped onto a wire or cable. The 2 outer edges have monofilament eyelets to allow clips to go through the material for stable installation.

When erecting Ultra-Pro Hailnet, the wire or cable spacing should be at 6.4m apart and the use of Cosio 5/8th Shackles is recommended to attach the net to wires or cables.
