

ULTRA-PRO WINDBREAK FABRICS

Agriculture, Horticultural & Industrial applications

Windbreak fabrics are used in a variety of applications including protecting plants from livestock damage, and protection from heavy wind. For the commercial grower, the effects of a strong wind can be even more damaging with plants drying out, wind burn and physical damage due to the wind strength.

Installation of Windbreak Fabrics

There are many ways of installing windbreak to structures, steel gate fences, timber poles, pole and wire structures etc. For the most economical installation for you please feel free to contact our Sales Department for the best installation guide for your application. We can give you advice on the size poles required, wire if required including billow wires if necessary and most importantly which of the following windbreaks are best suited for your application.

WINDBREAK SK

Semi Knitted Windbreak – Non Fray

Windbreak SK is a cost effective short term Windbreak used to establish young trees on farm properties, boundary fences and residential homes and is used extensively in the avocado industry.

Available in widths of 0.91m, 1.83m, 2.74m, 3.66m and comes in Green or Black. Manufactured using UV Stabilized PP tape yarn and monofilament yarn, it is a robust windbreak. For a short term Windbreak approx 5-7 years, do not go past Windbreak SK.

Wind Porosity approx 36%

WINDBREAK ULTRA-PRO LT

Light Knitted Windbreak

Windbreak LT is a light weight knitted Windbreak and is used for establishing young trees and for boundary fences on properties.

Available in 1.0m and 1.83m width and is Green in colour. Manufactured from HDPE Monofilament yarn, it has a life span of approx 7 to 10 years. It comes with eyelets on both sides for easy erection using wire or clips. For a longer life light weight windbreak then look no further than Windbreak LT.

Wind Porosity approx 65%
