

ADHESIVE TAPES

A photograph showing three rolls of black adhesive tape (B & A Tape) and one roll of white adhesive tape (Frameguard tape) on a light-colored surface. The black tapes are in the foreground, and the white tape is in the background, partially unrolled.

B & A Tape

Building & agricultural tape
Black, PVC

Used to seal, join or repair polythene sheeting

- 48mm x 30m (24/ctn)
- 72mm x 30m (20/ctn)
- 96mm x 30m (10/ctn)
- 144mm x 30m (10/ctn)

All weather tape

UV stabilised repair tape
Clear, 12-18 month lifespan

For temporary repairs to greenhouse film.

- 48mm x 25m (18/ctn)
- 96mm x 25m (6/ctn)
- 400mm x 25m

Frameguard tape

Felted self adhesive tape
Premium, 2mm thick, white

Used on greenhouse frames to prevent damage to greenhouse film.

- 30mm x 22m (7/ctn)
- 50mm x 22m (4/ctn)
- 70mm x 22m (4/ctn)
- 110mm x 22m (2/ctn)

Heavy duty repair tape

UV stabilised repair tape, reinforced
Clear, 3-4 year lifespan

For joining, patching or repairing greenhouse film.

- 100mm x 20m

*Avoid applying tapes in low temperatures or to wet or damp surfaces. This may result in the adhesive not curing properly.
