

AQUALINER

By Cosio Industries Ltd

Aqualiner 300 is a domestic lining membrane which is suitable for all types of fish ponds, tank liners or general heavy duty water proofing.

Aqualiner 300 is the ideal solution for all domestic ponds and water storage. Aqualiner 300 is manufactured from UV stabilised Polyethylene for a longer life

Cosio Industries Ltd have the ability to offer a welded fabrication service for larger sizes than stocked in our Auckland factory.

For effluent ponds use Firestone Geomembrane EPDM synthetic rubber
