

DURA-SKRIM®

Scrim reinforced pondliner

RAVEN

Dura-skrim is a high strength, highly flexible, scrim reinforced pond lining membrane.

Dura-Skrim pondliner can be installed with either the grey or black side up depending on user preference. Ensure the excavation is smooth and no rocks or tree roots are likely to cause damage to the liner. A base of sand is recommended or Bidim geotextile can be layed as a protection fabric. When installing the liner ensure it is not too tight as some shrinkage can occur in UV sunlight overtime. Ensure the liner has time to settle into the excavation corners before placing rocks & filling with water.

Applications

- Fish pond liner
- Tank liner
- Heavy duty waterproof cover

Advantages

- Resists tearing / punctures
- UV stabilised
- High flexibility
- Made in the USA

Technical specs

- Roll size - 3.66m, 5.48m, custom welded
- Roll lengths - 25m or cut to length
- Thickness - 0.51mm
- Weight - 361gsm
- Material - Scrim reinforced polyethylene
- Colour - black / grey
- 10 year UV warranty (Pro rata)
