

POLYGRO (R)

By Cosio Industries Ltd

Polygro (R) is a reinforced polythene designed for use where a high strength film is required. Woven from high quality PE, Polygro (R) resists puncturing and tearing.

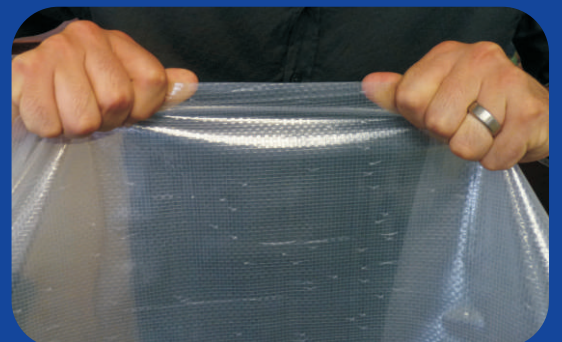

Polygro (R) is manufactured from UV stable polyethylene, it is natural in colour which gives it a high light transmission. Polygro (R) is woven which makes it extremely resistant to puncturing or tearing, this makes it suitable for greenhouse sides and in some cases it can be used as the roof plastic.

Applications

- Greenhouse / hothouse sides
- Pergola / Gazebo roof
- Extra strength waterproof covering
- Carports
- Greenhouse guttering

Technical specs

- Width - 2.05m
- Length - 50m, 100m, Cut to length
- Colour - Natural
- Light Transmission - 80-85% approx
- Material - Woven Polyethylene, 9x9 per square inch, 180GSM
- Life expectancy - 3-5 years

Polygro Reinforced can be fabricated to custom sizes, please ask our sales team for pricing and leadtime.
