

TITAN

Scrim reinforced polyethylene

Titan is a scrim reinforced, UV stabilised plastic.

Titan resists tearing and is ideal for carports, pergola roofs, scaffold weather proofing and domestic greenhouses.

Applications

- Domestic greenhouse covering
- Pergola roof
- Carport sides
- Scaffolding wrap

Advantages

- UV stabilised
- Strong & durable
- Resists tearing & puncturing
- High light transmittance
- Made in the USA

Technical specs

- Width - 1.83m x 30m (folded) or cut to length
- Colour - Clear / opaque
- Light transmission - 85-90% approximately
- Thickness - 200gsm
- Life expectancy - up to 3 years, depending on installation & application.

Titan can be installed onto timber framing using nail plates or timber battens. Ensure the timber is smooth with no rough or sharp edges which could damage the plastic & shorten its lifespan.
